

Hunting has been and remains a core tradition for Buck. What began as one man's hope and determination, has now transformed into a legacy passed on by families everywhere. This group of classic hunting knives offers a functionality way ahead of its time, yet still performs without complaint today.

The Micarta® Harvest Series™ line of knives includes a caping, boning, and waterfowler knife, which cover the field needs of both the novice and experienced outdoorsman. The qualities of both the caping and boning knife make the precise task of harvesting quite simple. The Waterfowler is a significant accessory knife and best choice for dressing birds. Each knife in this series contains a full tang blade for added strength and durability. The Linen Micarta® handle on each knife is nearly impervious to weather, oils, and solvents, making them superior for wet conditions by providing a secure, comfortable grip.

Pack light, cut easy. The PakLites\* are specifically designed to provide hunters with everything they need for field dressing. These razor sharp tools are constructed of 420HC stainless steel, creating a lean, mean and easy-to-clean tool. The black and orange models are coated with Buck's traction coating to provide a sure grip. Sold individually or in the popular Field Master kit, the PakLites\* are an essential tool for any hunting trip.

"The PakLite is the best solution for remote backcountry hunts. It's the same legendary Buck performance in a lightweight design that allows you to cut, gut, skin and quarter while the sheath makes packing a cinch."

Casey Keefer

Host of Dropped: Project Alaska and Rival Wild

The experts at Buck have created combo sets as an efficient way to offer hunters flexibility in the field, while providing them with the tools necessary to complete any task. For added convenience, the combo packs come with a specifically designed sheath to carry both knives

# 🕦 393/135 Omni Hunter® Combo With PakLite® Caper

A versatile 393 skinner with guthook paired with a 135 PakLite\* caping knife.

Heavy-duty nylon combo sheath included! **CARRY WEIGHT:** 11.5 oz. (326 g)

Introducing the Splizzors™, Buck's new multi-purpose fishing tool. The Splizzors™ innovative design efficiently combines the use of scissors and pliers to create a versatile tool even for the most rugged of fishing tasks. Utilizing the concepts of BASS Elite angler Bill Lowen, the Buck product development team designed a tool that through extensive field testing by a variety of experienced anglers, has been developed into the ultimate fishing product. All the features, designed into one product, pack easily in a nylon sheath for safe storage and secure carry.

Introducing the new Marksman™! Designed with a new locking mechanism developed by Grant and Gavin Hawk, the SLS (Strong Lock System) is one of the strongest locking mechanisms on the market. Aided by a ball bearing pivot system the Marksman<sup>TM</sup> is quickly and easily deployed by sliding one finger along the lock strap. With a hefty blade of 154CM steel and a solid aluminum handle, the Marksman<sup>TM</sup> is designed for heavy tactical operations.

000

New locking engagement so strong it's virtually a fixed blade!

3 1/2" (8.9 cm) drop point,

154CM steel LENGTH 8 1/4" (21.0 cm) overall THICKNESS 0.120"

4.0 oz. (113.4 g) Aluminum Anodized Black WEIGHT HANDLE

CLIP Stainless steel BOX: MODEL # 0830BKS-B, CATALOG # 7788 CLAM: MODEL # 0830BKS-C, CATALOG # 7789

Fully opening the blade with either the blade hole or flipper securely engages the SLS (Strong Lock System).

To close: Holding the back of the knife, release the blade by slightly raising the front end of the lock strap where the notches are. Be sure to control the blade as the ball bearing system greatly minimizes any friction allowing the blade to close quickly.

The rising demand for the SpitFires™ prompted the development of the new Mini SpitFire™. The colorful folders are slim and sleek, with a lockback mechanism for safe use and thumb hole for easy one-hand opening. Anodized aluminum handles make for a light and durable tool. Now with two sizes to choose from, the trendy SpitFires are offered in three popular colors to appeal to the outdoor enthusiast, collector and everyday carrier.

#### SHIFT MECHANISM®

Our latest breakthrough is the patent-pending Shift Mechanism®. This feature, incorporated into the Paradigm® series, serves as an advanced locking mechanism through a rotating bolster that keeps the blade from accidently opening or closing. With a slight glide of the bolster and a flick of the finger, this knife is easily opened. Combined with Buck's patented ASAPTM opening technology, the Shift Mechanism® creates a knife that's ready the instant it's needed.

# New Handle Design!

All Buck Assisted Opening knives are under; US 7,107,686; 7,313,866 and patent pending. Licensed under one or more of the following patents:

Buck's ASAP assisted opening knives are functionally different than automatic/switchblade knives. Switchblade knives use a button/lever in the handle to release the blade and the blade cannot be moved at all without entirely opening the knife. As with many things, knife laws change and vary from location to location. It is the user's responsibility to comply with all regulations. For more information and general definitions please visit www.ATKLorg

#### CHAIRMAN SERIES WITH COMFORTCRAFT®

As a testament as to why Buck knives has been the number one knife makers for over 110 years, these knives are as American as Buck. For years parents have been passing knives down to their children. These ComfortCraft® knives were designed with extra attention to detail and hand finished so they fit comfortably in your pocket and in use. Crafted in the USA and modeled after the high standards and hand craftsmanship set forth by founder Hoyt Buck, the knives in the Chairman Series are the epitome of Buck.

With design counsel from our Chairman of the Board, Chuck Buck, the Chairman Series holds his signature on each knife handle to endorse the superior quality of these knives.

"My grandfather's craftsmanship... a legacy four generations strong"

-Chuck Buck,

Famous knife designer, Wilde Bill Cody, has been designing for Buck Knives since the 1970s. His Native American heritage and exceptional artistry skills allow him to create beautiful and unique knives. This year he custom designed a set from red stabilized cedar featuring a beautiful turquoise spacer. With only 250 of each knife being created, each blade is mirror polished and is enhanced with his custom file work.

Hours of hand craftsmanship go into each David Yellowhorse knife. Yellowhorse is a celebrated Navajo artist and craftsman who continues to transform Buck Knives into classic works of art. For 2014, he brings you a beautiful 921 Skinner. This handcrafted handle is made from Turquoise, Black Jet, and Nickel Silver. Yellowhorse creates such exquisite pieces that collectors everywhere anxiously await to see his latest work.

Jeff Legerton has been with Buck Knives for 30 years and has spent over 15 years working in our Custom Shop and Specials Department. It was immediately noticed that his creativity inspired designs with very unique elements and prompted us to showcase him as a designer. This 927 Skinner is a new design, never before put into production at Buck Knives. Created with a beautiful handle of Buffalo and Honey Jasper with a large Nickel Silver guard, this knife is too beautiful to use, but would be most effective if the presented the self-section of the presented the self-section of the

## 927 Buffalo & Honey Jasper Skinner

Mark McLean has been designing and building since he was a kid in his dad's garage. His grandpa gave him his first knife and taught him that patience is the friend of creativity. With more than 20 years experience, Mark has developed an expertise in professionally designing hand-held products for a variety of international manufacturers. He finds inspiration in the natural world while camping, hunting and mountaineering. Mark has been on the product development team at Buck Knives since 2005. His design in the Thorn marries machine created parts with hand craftsmanship. The Thorn is our first Legacy knife to be considered a "modern heirloom," and hints at many new designs to come.

Buck's Heritage Collection offers exceptional beauty and craftsmanship. Designed by Buck's employees and handcrafted in the USA with precious materials and strikingly dramatic designs, these knives are often defined as cherished family heirlooms.

#### SHARPENING TIPS

Every knife needs sharpening from time to time. Follow these steps to maintain a sharp, even edge.

 It is ideal to match the original factory edge angle. Buck's Edge 2X<sup>™</sup> Technology ensures the edge angle for performance, Hunting is 13°/16°

- Draw the edge across the sharpener as if trying to slice off a thin layer.
- Spend an equal amount of time on each side of the blade.
- Repeat these steps with successive finer grits until the desired sharpness is achieved.

Remember: a sharp knife not only performs better, it's actually safer because it cuts easily without a lot of force or awkward motions.

#### SPECIAL MARKETS - CUSTOMIZE ANY KNIFE

Whenever there is a special event, a Buck knife can help mark the occasion memorably. Whether it's a wedding, a birthday, an anniversary, a rite of passage, a service award or an auction item for fund raising, you name it - Buck can make it a very special, appreciated and treasured gift for years to come.

Start with any knife that's appropriate, and then let us customize it in any way you like. Maybe it's a message etched on the blade. Maybe the handle is specialized. Our artisans can do so many things, you'll find they can create the perfect answer to your search for that commemorative treasure.

Minimums are required for some of these projects. Please contact your Sales Representative for details and to place orders.
